

Call to Action: Developing OH Food Systems Transdisciplinary Practitioners

Dr. Bonnie Buntain, Professor Emerita, Public
Health and Food Safety, University of Calgary

Today's Food Journey

- Complexity & challenges of sustainable food systems
- Growing need for OH approaches applied to food
- Why we need to develop OH transdisciplinary practitioners
- Barriers to implementing the OH approach
- Tools for academia and organizations

Emergence of Convergence

**Genetic
and
Biological
Factors**

**Physical and
Environmental
Factors**

Ecosystems

Animals

**Unsustainable
Food Systems**

Humans

**Social,
Political, and
Economic
Factors**

**Ecological
Factors**

(Adapted from L. King)

Changing climates
impact disease
vectors & their
hosts

Greater impact on
poor socio-
economic
populations

Water wars emerge

EXAMPLE: developing an E coli O157:H7 vaccine.

How can we build capacity to better solve food systems' challenges?

First, we must consider the deep-seated root causes of ill health and inequities:

Social-cultural Psychological

Gender Economic

**Health Policies: Human, Animal,
Ecosystems**

Requires a *socio-economic, preventive* One Health approach

One Health Approach

One Health Transdisciplinary Approach: Collaborative & Interconnected

Multidisciplinary

**Conceptual
Framework**

**Conceptual
Framework**

**Conceptual
Framework**

Interdisciplinary

**Conceptual
Framework**

**Conceptual
Framework**

**Transdisciplinary
Leaders**

Conceptual Framework
Inter-sectorial blending

Applying the One Health Approach: Transdisciplinary Participatory Research

Decision makers

Scientists

Concerned population

OH TD Practitioners

Slide from J. Zinsstag

Dramatic Shift Needed in Academia

Encourage, support, create
opportunities for TD to
complement traditional
disciplinary research
approaches

Focus on prevention & root
causes of unsustainable
food systems

- Researchers and practitioners trained in *participatory and interactive processes linking natural and social sciences* often form the backbone of long-term collaborative networks.
- *Transdisciplinary practitioners* are as valuable to the project as other disciplinarians, and they need to be involved from the beginning of a project.
- Research-led universities especially can create enabling environments

Transdisciplinary One Health Practitioner Emerging Career

**Emerging career
profile**

NNA Key Components

National Science Foundation Call for Proposals 2019: Navigating the New Arctic

Innovate for Arctic Observing

Advance Research and Modeling

Co-Produce Knowledge

Build and Enable Partnerships

Advance STEM Education and Workforce

OH Transdisciplinary
Approach/Leadership

Barriers to One Health

7 BARRIERS to One Health Practice

- Long term relationship-building versus demands for quick results
- Disciplinary language and cultural differences
- Institutional “silos” lack interdisciplinary staff & shared reporting systems
- Budgetary constraints & unequal allocations
- Perceived power differentials among disciplines & programs
- Rewards lacking
- Lack of expertise in transdisciplinarity

Call to Action: Building OH TD

Capacity

Call to Action: Building OH TD Capacity- cont'd

- Creating a culture of integrative research
- Co-location and clustering of disciplines
- Create a OH overarching institutional mandate
- Strategically plan joint appointments
- Seed team grant funding
- Internal food systems administrative support
- Modify institutional reward system
- Create unique student career trajectories with community experience

Example: One Health TD Food Systems Practitioner Competencies

- Cross-sectorial problem solving abilities
- Critical thinking and objectivity; preventive focus
- Leadership, excellent written and oral communication, negotiation skills
- Knowledge of various food sectors' businesses, production challenges and consumer behavioral science
- Root cause analyses: consumers/communities
- Food system sciences, policies, regulations
- Discipline expertise
- Having certification in multiple food businesses (NZ)

Competency Based Food System Curriculum

Leadership	Leadership Development – Employee to Senior Executive			Talent Manage- ment	Emerging Issues Public Health	Societal & Gov’t Values & Ethics
Specialist	Practicum / on the job / recognition					
	Food Specialist	Plant Specialist	Animal Specialist			
	Training in common					
Journey	Practicum / on the job / recognition					
	Food Specific	Plant Specific	Animal Specific			
	Training in common					
Entry	Practicum / on the job / recognition					
	Foundation Food	Foundation Plant	Foundation Animal			
	Training in common					

Examples: Integrating OH Approach into Professional Career Development

- OH research groups, seminar series & workshops
- Develop international, cross-sectorial networks
- Publish OH approach in TD & disciplinary journals
- Subscribe to OH networks (e.g., OH Commission)
- Attend & present posters at TD conferences (Ecohealth, Int'l OH Congress, etc.)

Out Now From CABI Publishers

A practical book that examines the origins of One Health and describes how to put policy into practice.

Part 1: Theoretical Foundations

**Part 2: Methods for the Assessment of the
Animal-Human Linkages**

**Part 3: Case Studies from Research to Policy
and Practice**

**Part 4: Capacity Building, Public
Engagement and Conceptual Outlook**

Today's Food Journey

- Complexity & challenges of sustainable food systems requires an inter-sectorial, ID preventive approach
- Urgency to develop a cadre of OH transdisciplinary practitioners to lead, facilitate inter-sectorial teams
- Barriers include “doing business as usual”
- Tools include developing innovative career path models and organizational mandate

What's in our future?

A vibrant sunset over a desert landscape. The sky is filled with soft, wispy clouds in shades of pink, orange, and yellow. The sun is low on the horizon, creating a bright glow. In the foreground, the silhouettes of trees and mountains are visible against the colorful sky. The text "THANK YOU!!" is centered in the upper half of the image, and "SONORAN DESERT SUNSET" and "TUCSON ARIZONA" are centered below it.

THANK YOU!!

SONORAN DESERT SUNSET

TUCSON ARIZONA

What is the OH Approach?

- It necessitates coordinated, collaborative, multidisciplinary and cross-sectoral transdisciplinary research at the animal-human-ecosystems interface
- It includes the broader ecosystem, as well as economic and social dynamics that **impact human, animal, and environmental health.**

Example of a transboundary, intersectoral research project event timeline
