

Drawing a Ginkgo Leaf

1. On your paper, using a graphite pencil, lightly draw a V shape. These will be the sides of the leaf.
2. Connect the top lines of the V with a curved, jagged line. This will be the top of the leaf.
3. Add a stem to the bottom of your leaf.
4. Lightly add vertical veins
5. Lightly add yellow all over
6. Add green, using vertical strokes
7. Continue to alternate yellow & green, making the color brighter.
8. Add a bit of brown on some edges
