

Lizards

<p>Lay eggs on land.</p>	<p>Skin covered with scales.</p>	<p>Hibernate in soil, rock crevices, and caves.</p>
<p>All of these have lungs for breathing.</p>	<p>Feet have claws.</p>	<p>Some will thrive in very dry environments.</p>
<p>Most have external ear openings.</p>	<p>In Pennsylvania, there are only four species of these.</p>	<p>Do not spend much if any time in water during any part of their lives.</p>
<p>After hatching these look like miniature adults.</p>	<p>Eggs have a hard leathery shell.</p>	<p>Have lungs throughout their lives.</p>
